|--|-------------|
| Anthropology 409 Syllabus  | 1           |
| Fleagle JG (1985) Size and adaptation in primates. In (WL Jungers, ed)<br><i>Size and Scaling in Primate Biology</i>   | 11          |
| Kay RF (1984) On the use of anatomical features to infer foraging behavior<br>in extinct primates. In (PS Rodman and JG Cant, eds.)<br><i>Adaptations for Foraging in Nonhuman Primates.</i> | 21          |
| Sargis EJ (2004) New views on tree shrews: The role of Tupaiids in primate<br>supraordinal relationships.  | 39          |
| Janecka J et al. (2007) Molecular and genomic data identify the closest<br>living relative of primates.  | 51          |
| Tavare S, CR Marshall, O Will, C Soligo and RD Martin (2002) Using the fossil<br>record to estimate the age of the last common ancestor of extant primates.                                  | 55          |
| Bloch JI and DM Boyer (2002) Grasping primate origins.   | 59          |
| Bloch JI et al. (2007) New Paleocene skeletons and the relationship of plesiadapiforms<br>to crown-clade primates.   | 65          |
| Sargis E (2002) Primate origins nailed.  | 71          |
| Gebo DL (2004) A shrew-sized origin for primates.  | 73          |
| Beard KC (2008) The oldest North American primate and mammalian biogeography<br>during the Paleocene-Eocene Thermal Maximum.   | 97          |
| Smith et al. (2006) Rapid Asia-Europe-North America geographic dispersal of earliest<br>Eocene primate Teilhardina during the Paleocene-Eocene Thermal Maximum.                              | 101         |
| Chaimanee et al. (2007) First Middle Miocene sivaladapid from Thailand.  | 107         |
| Fleagle JG (2010) The Many Worlds of Ida   | 117         |
| Dunn et al. (2006) Hindlimb adaptations in Ourayia and Chipetaia, relatively<br>large-bodied omomyine primates from the middle Eocene of Utah.   | 125         |
| Rafferty KL et al. (2002) Molar microwear of subfossil lemurs: improving the<br>resolution of dietary inferences.  | 133         |

|   |     |
|---|-----|
| Godfrey L and WL Jungers (2003) The extinct sloth lemurs of Madagascar.   | 147 |
| Simons EL (1994) The giant Aye-Aye <i>Daubentonia robusta</i> .   | 159 |
| Gebo DL et al. (2000) The oldest known anthropoid postcranial fossils and the early evolution of higher primates.                             | 167 |
| Seiffert ER et al. (2005) Basal anthropoids from Egypt and the antiquity of Africa's higher primate radiation.                                | 171 |
| Simons et al. (2007) A remarkable female cranium of the early Oligocene anthropoid <i>Aegyptopithecus zeuxis</i> (Catarrhini, Propithecidae). | 177 |
| Bajpai et al. (2008) The oldest Asian record of Anthropoidea.   | 183 |
| Temerin LA and JGH Cant (1983) The evolutionary divergence of Old World monkeys and apes.   | 189 |
| Benefit BR (1999) <i>Victoriapithecus</i> : The key to Old World Monkey and Catarrhine origins.   | 199 |
| Zalmout et al. (2010) New Oligocene primate from Saudi Arabia and the Divergence of apes and Old World monkeys                                | 219 |
| MacLatchy L (2004) The oldest ape.  | 225 |
| Ward S et al. (1999) <i>Equatorius</i> : A new hominoid genus from the middle Miocene of Kenya.   | 239 |
| Conroy GC, et al. (1993) Diamonds in the desert: the discovery of <i>Otavipithecus nambiensis</i> .   | 245 |
| Moya Sola S et al. (2004) <i>Pierolapithecus catalaunicus</i> , a new middle Miocene great ape from Spain.                                    | 253 |
| McBrearty S and N Jablonski (2005) First fossil chimpanzee.   | 259 |
| Chalmanee et al. (2004) A new orang-utan relative from the late Miocene of Thailand.  | 263 |
| Kunimatsu et al. (2007) A new late Miocene great ape from Kenya and its implications for the origins of African great apes and humans.        | 267 |
| Suwa et al. (2007) A new species of great ape from the late Miocene epoch in Ethiopia.  | 273 |
